- **Skills:** Reading
- **Topics:** Vocabulary; Daily Routine

The enigma

- **Toolbox**

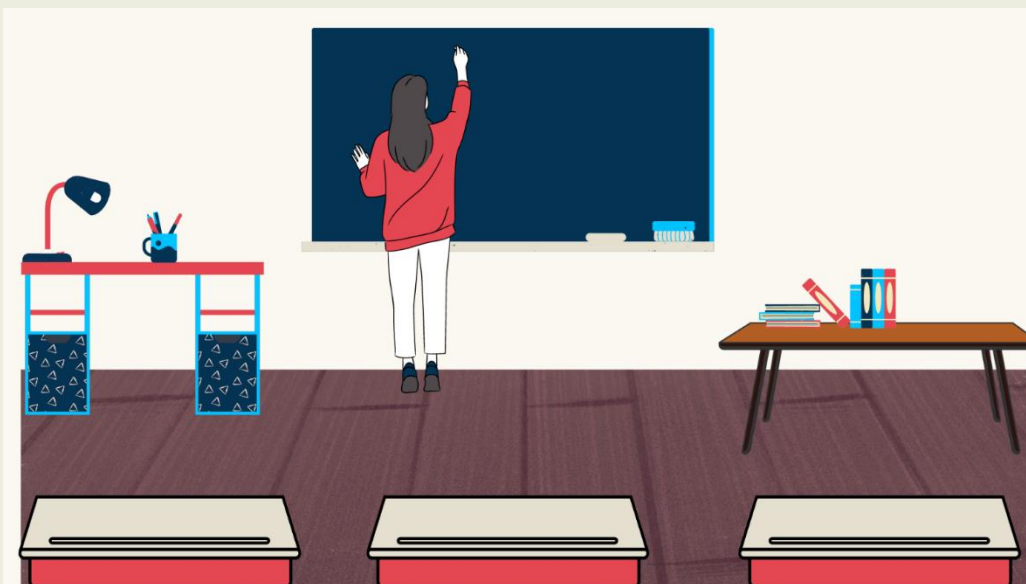

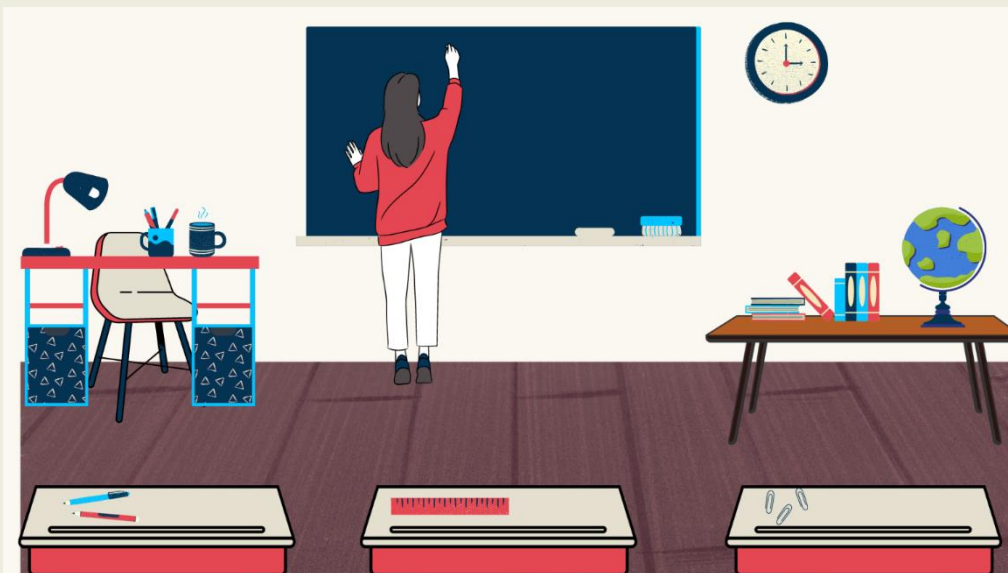

Paper A4,
Different classroom items,
Images with differences created on Canva.

Daily Routine

- **Description of the enigma**

Create two images of a classroom, one in which various objects will be missing, and put those objects somewhere in the classroom. The players should find the differences between those images. This enigma will be behind one of these images

Daily Routine

YOU CAN EAT ME IN THE EVENING, BUT NOT IN THE MORNING.

WHAT AM I?

(Solution: Dinner)

The solution of the enigma (dinner) will lead them in the game. F

For example, you can put a set of cutlery in the room and a small piece of paper wrapped around it will let the players know that the objects found at the beginning of the game can be found in the classroom and give them important information to proceed in the game.

For the teachers, spot 7 different items (make sure that it is the same found in the first game) and hide behind, under or in them a small paper with these sentences:

You do this after a long day, just before you go to sleep.

Solution: have a shower

You do this when your alarm clock goes off in the morning.

Solution: get up

You do this in the morning because it is the most important meal of the day.

Solution: have breakfast

You do this at the dinner table with your family.

Solution: have a dinner

Your dentist will be pleased if you do this twice a day.

Solution: brush your teeth

You do this in the afternoon when your classes at school have finished.

Solution: do your homework

Before letting the children around the classroom to find the items and the sentences that these include, let them know that they will have to figure out what kind of activity the sentence

Daily Routine

describes. In one the seventh item that the players will search for, hide this sentence
“Prioritize the activities to move on”.

The next clue will be a code made from the order in which the daily activities are performed. In this case, the solution is: 235641

Hints

1. If your students don't find all 7 items missing on the images, describe the items they are missing.
2. If your students don't find the answer to any of the sentences, help them by showing them a picture or giving one more description of the activity.
3. If your students don't find the correct order after several attempts, help them by saying what you do each day in other words than those used in the enigma.
