

# Comparative & to Superlative

## Introduction

- **Level:** A2
- **Skills:** Writing
- **Topics:** Grammar
- **Merging subjects:** Maths

## The enigma

- **Keywords**

A chatbot will tell the students that it needs information about to pairs of fruits, and that it needs students to tell it 3 things that are different for each set. Then it will send the pictures below for the students to find them around the room and weigh them with a scale to be able to compare them.

- **Toolbox**

Digital scale, chatbot, bananas, apples, pears, grapes, nuts and a bowl, a numeric code lock for the next enigma.

# Comparative & to Superlative

- **Description of the enigma**

Type comparative and superlative sentences into the chatbot to give it the information it needs about these fruits:

When the students correctly type 5 different comparative sentences and 1 superlative sentence the chatbot will tell them that the code for the next lock is the weight of two bananas and a pear (Which the GM has had to weigh before in order to set the code)

# Comparative & to Superlative

## Hints

Which is heavier, an apple or a pear?

Can you find any scales?

Which is the sweetest fruit?

Maybe the chatbot could ask these questions if the students don't type anything after 5 minutes.

## More information

## Possible restrictions

Possible health & safety problematic as some of the object need to be moved and weighed so extra care needs to be taken by the players.
