- **Topics:** Vocabulary
- **Merging subjects:** Creative thinking, problem-solving, critical thinking, writing

comprehension

## The enigma

- **Keywords**

Travel, directions, map

- **Toolbox**

Worksheet, pen, paper

- **Description of the enigma**

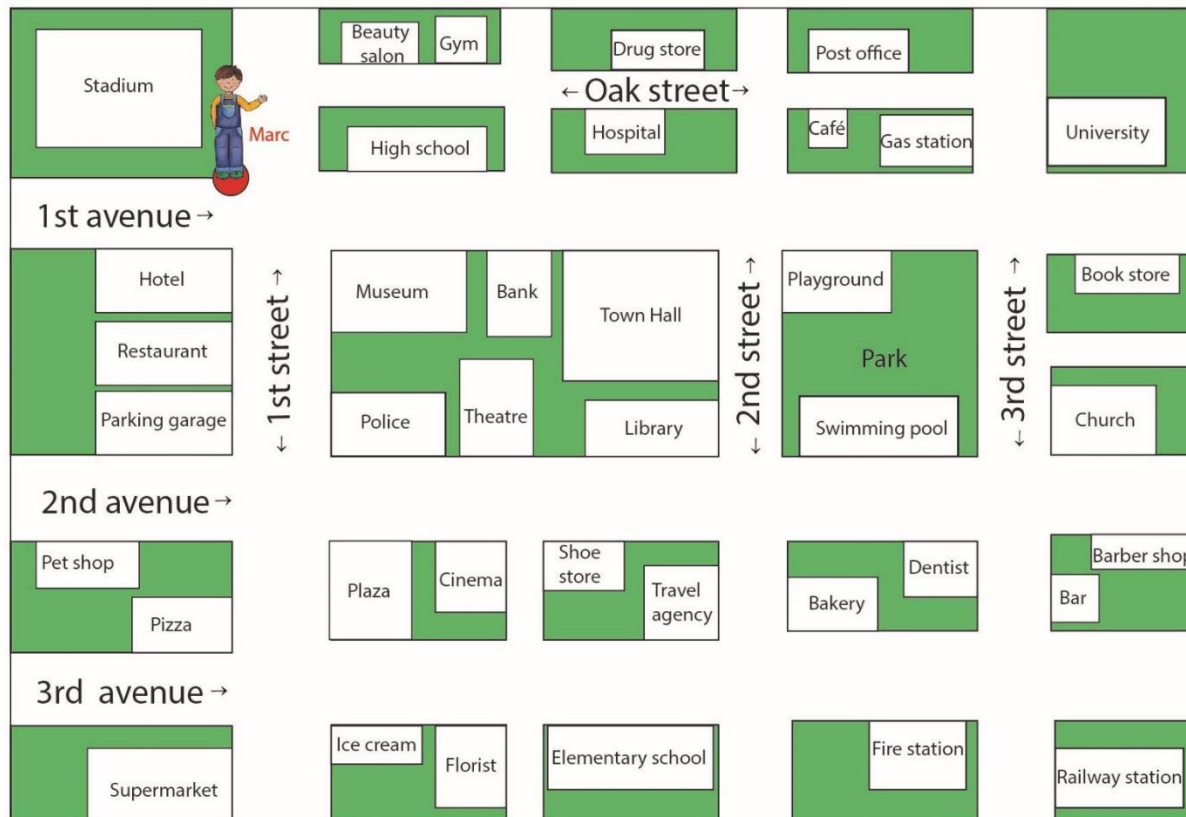

The participants have to read the city map and help the boy reach his destinations by giving directions. These should be written down and in the end from this text, the answers for the final questions can be discovered. The sheet with the directions is hidden in a book.

# Travel and transport

Help Marc find his way through the city! Where exactly he wants to go, you will find hidden in one of the books in the room. Then be attentive and help him by describing the simplest way. Write down your answers.

Marc first wants to visit the Town Hall. From there he wants to go to the Fire station by passing the Library and Bakery. After that a visit to the Bar would be good by going alongside 3<sup>rd</sup> street. Leaving, he should go to the Playground. After that comes the Drug store, then the Bank. From there he wants to go to the Elementary school passing the Ice cream shop and finally the Swimming pool by turning right from 2<sup>nd</sup> street.

# Travel and transport

After you helped Marc and wrote down the directions given, read your text again and answer the questions. That way you will discover the code.

Leaving the Fire station what direction does Marc take?

From the Playground, in which direction does he continue?

After the Bank he has to turn the corner at the Museum to the ....

To reach the Swimming pool, after leaving the Elementary school he should turn...

## Solution

left– right – left – left

## More information

## Possible restrictions

Students with Dysgraphia or Dysphasia may encounter some difficulties .
