

Trouble in the International Space Station

Scenario Conception and setup

Items' index

This scenario is in the format of a card game. It is therefore very easy to design: you will find attached the templates of all the cards needed for this scenario.

- A printer
- Regular paper sheets
- Scissors

Optional

- Laminating machine
- Paper cutter machine
- Thick paper

Detailed conception

| Low-cost

The most accessible version is to print the attached file on both sides on an A4 printer and then to cut the cards. The cards have been created with the template of tarot cards (61mm x 112mm). This format does not allow for good readability of the text and images on the cards. We recommend printing the cards on a 91.5mm x 168mm or 122mm x 224mm format (but this last option will use a lot of paper).

If you prefer to print only on one side, you will have to:

- Either place the two sides of the same card in a protective card sleeve (available in stores). It is recommended to put a slightly rigid paper between the two sides to make the card easier to handle.
- Either glue the two sides together or on a slightly rigid paper so that the card is easier to handle.

Laminating the cards would be a plus as it makes them easier to handle (especially for people with fine motor impairments) and extends their lifespan. If necessary, you can use protective card sleeves (available in stores).

| High cost

If you have the necessary equipment, or if you wish to use an external service, you can print these cards on thick paper.

Setup

Game Master material

The document “Scenario Game Master” indicates to the Game Master the hints available according to the players' progress.

Regular cards

Set the “00” card aside.

Shuffle the rest of the cards and create a deck: back side on the top. Put the “00” card on the top.

A3 sheets

Fold each A3 sheet in half and create a deck with them. Let the back side of the cards visible.

Reboot

Regular cards

Set the “00” card aside.

Check that all the cards are still here and not damaged.

Shuffle the cards and create a deck: back side on the top. Put the “00” card on the top.

A3 sheets

Fold each A3 sheet in half and create a deck with them. Let the back side visible.
